Multiple Choice (Select 1 out of 6 options, for the question below.)

What one of the following statement is true about Grid Computing?

153  
2023/06/27

Options

- Pieces combine small tasks into complex tasks
- The subscription tier plays an important role in grid computing
- Breaks complex tasks into small operations
- Both A and C

After the eruption, completely burying the city and filling the harbor with congealed lava. Meanwhile, on the other side of the mountain, cinders, ash, and pumice rained down on Pompeii. Sparks from the burning ash ignited the combustible rooftops quickly. Large portions of the city were destroyed by the conflagration. Fire, however, was not the only cause of destruction. Poisonous sulfuric gases saturated the air. These heavy gases were not buoyant in the atmosphere and therefore sank toward the earth and suffocated people. Over the years, excavations of Pompeii and Herculaneum have revealed a great deal about the behavior of the volcano. By analyzing data, much as a zoologist studies an animal specimen, scientists have concluded that the eruption changed large portions of the area's geography. For instance, it turned the Sarno River from its course and raised the level of the beach along the Bay of Naples. Meteorologists studying these events have also concluded that Vesuvius caused a huge tidal wave that affected the world's climate. In addition to making these investigations, archeologists have been able to study the skeletons of victims by using distilled water to wash away the volcanic ash. By strengthening the brittle bones with acrylic paint, scientists have been able to examine the skeletons and draw conclusions about the diet and habits of the residents. Finally, the excavations at both Pompeii and Herculaneum have yielded many examples of classical art, such as jewelry made of bronze, which is an alloy of copper and tin. The eruption of Mount Vesuvius and its tragic consequences have provided everyone with a wealth of data about the effects that volcanoes can have on the surrounding area. Today, volcanologists can locate and predict eruptions, saving lives and preventing the destruction of other cities and cultures.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

Scientists analyzed data about Vesuvius in the same way that a zoologist \_\_\_\_\_ a specimen.

Options

- describes in detail
- studies by cutting apart
- photographs
- chart

## Question No: 41

Nine people Sandeep, Harish, Lenin, Ravi, Abbas, Dinesh, Nisar, Venkat and Sumanth stay in a building. The building has nine floors and only one person stays on one floor. Each of them likes different colour uniforms namely- Red, Blue, Green, Yellow, White, Orange Brown, Grey and Violet. Each person belongs to different companies, i.e. Samsung, Onida, Panasonic, Videocon, LG, Whirlpool, Toshiba, Sharp and Sony but not necessarily in the same order. The ground floor is numbered 1, the floor above it is numbered 2, and so on, and the topmost floor is numbered 9. The one who belongs to Sharp Company stays on the 4th floor. There are 4 floors between the floors on which Ravi & Nisar stay with Ravi living above Nisar. Lenin stays on the floor immediately above Venkat's floor. The one who likes Red colour uniform stays on an even numbered floor and is a neighbour of the one who likes Blue colour uniform. Sumanth does not belong to Onida company. The one who belongs to Samsung company stays on the topmost floor. The one who likes Brown colour uniform stays immediately below the one who likes White colour uniform. Abbas likes Grey colour uniform. Dinesh belongs to LG company and stays on 8th floor. There are 3 persons between the one who likes Yellow colour uniform and the one who like Grey colour uniform. There are two floors between the floors on which people from Sony company and Sharp company stay. Abbas stays immediately below the floor on which the person from Videocon company lives. The person who likes Orange colour uniform belongs to Onida company and stays on an odd numbered floor. Sumanth stays on the bottommost floor. The person who likes Green colour uniform is from Videocon company and stays on 6th floor. The person from Toshiba company stays on 2nd floor. The persons from Whirlpool company and Onida company are not the neighbours of the person from Videocon company. Ravi likes Blue colour uniform and Nisar does not like Red colour uniform. Harish does not live below the floor of Sandeep.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

Green Colour uniform like by which of the following person?

Options

- Ravi
- Sandeep
- Nisar
- Sumanth

Family members are engineering graduates and others are arts graduates. All the eight family members are bankers. They are working in different banks: Andra Bank, Dena Bank, Syndicate Bank, Bank of India, Vijaya Bank, UCO Bank, Canara Bank and Allahabad Bank, but not necessarily in the same order. There are two married couples, three brothers, two daughters, one granddaughter and one grandson in the group. Two of the female members in the group E and L get same degree. They studied different degrees in colleges, they are B.com, BCA, M.com, BE, MBA, ME and B.Sc.

2025106121

2025106121

K, works in Andra Bank, is the head of the family, and is immediate neighbour of L and H. The granddaughter J is sitting third to the left of K. The grandmother of J is sitting on the immediate left of her. J is arts graduate. I is sitting second to the right of his father K. He works in Vijaya Bank, and studied B.Sc. Only K's daughter is sitting exactly between E and I. She studied MBA and she works in UCO Bank. L works in Syndicate Bank and F works in Bank of India. The son of L is sitting on the immediate left of his father. His father works in Dena Bank. G works in UCO Bank and is sitting on the immediate left of her mother. H, the husband of the one who works in Syndicate Bank, studied ME and his mother studied BE. The one who works in Bank of India sits second to the right of E, who is an immediate neighbour of the one who works in UCO Bank and the Canara Bank. The one who works in Canara Bank does not studied B.com and the one who works in Andra Bank does not studied M.com or BCA.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

The person who studied BE is working in which of the following banks?

Options

- Allahabad Bank
- Bank of India
- Syndicate Bank
- Both Allahabad Bank and Syndicate Bank

Question No. 36  
47479

7 Question 36 to Question 38 belong to the following comprehension.  
Comprehension:  
2023/08/17

Study the following information carefully and answer the given questions.

Sanjay, Vasu, Gandhi, Jairaj, Prathap, Kumar, Suresh and Ramnath are eight friends sitting around a circular table. Four of them are facing towards the centre and four of them are facing away from the centre. All of them like different Currencies, viz. Dollar, Pound, Dinar, Peso, Euro, Rupee, Yen and Riyal, but not necessarily in the same order. Prathap faces towards the centre and likes Dollar. Both the immediate neighbours of Prathap face away from the centre and like Dinar or Peso. Jairaj faces away from the centre. Both the immediate neighbours of Jairaj do not face away from the centre. Prathap sits third to the right of Kumar, who likes Euro and faces away from the centre. Gandhi sits third to the left of Kumar. The one who likes Dinar sits opposite of Kumar. The one who likes Pound is not the immediate neighbour of Kumar and faces away from the centre. Sanjay sits second to the left of Gandhi and does not like Yen or Riyal. The one who likes Yen sits between Ramnath and Kumar. Vasu faces away from the centre and does not like Pound.

Multiple Choice (Select 1 out of 4 options, for the question below.)

The only person who is sitting between Prathap and Suresh, likes which of the following currency?

---

Options

- Dinar
- Euro
- Rupee
- Peso

## Question No. 01

Volcanoes

Mount Vesuvius, a volcano located between the ancient Italian cities of Pompeii and Herculaneum, has received much attention because of its frequent yet destructive eruptions. The most famous of these eruptions occurred in A.D. 79. The volcano had been inactive for centuries. There was little warning of the coming eruption, although one account unsanctioned by archaeologists says that a hard rain and a strong wind had disturbed the pastoral calm during the preceding night. Early the next morning, the volcano poured a huge mass of molten rock down upon Herculaneum, completely burying the city and filling the harbor with coagulated lava. Meanwhile, on the other side of the mountain, cinders, ash, and ash rained down on Pompeii. Sparks from the burning ash ignited the combustible rooftops quickly. Large portions of the city were destroyed in the conflagration. Fire, however, was not the only cause of destruction. Poisonous sulfuric gases saturated the air. These heavy gases were not buoyant in the atmosphere and therefore sank toward the earth and suffocated people. Over the years, excavations of Pompeii and Herculaneum have revealed a great deal about the behavior of the volcano. By analyzing data, much as a zoologist dissects an animal specimen, scientists have concluded that the eruption changed large portions of the area's geography. For instance, it turned the Sarno River from its course and raised the level of the beach along the Bay of Naples. Meteorologists studying these events have also concluded that Vesuvius caused a huge tidal wave that affected the world's climate. In addition to making these investigations, archaeologists have been able to study the skeletons of victims by using distilled water to wash away the volcanic ash. By strengthening the brittle bones with acrylic paint, scientists have been able to examine the skeletons and draw conclusions about the diet and habits of the residents. Finally, the excavations at both Pompeii and Herculaneum have yielded many examples of classical art, such as jewelry made of bronze, which is an alloy of copper and tin. The eruption of Mount Vesuvius and its tragic consequences have provided everyone with a wealth of data about the effects that volcanoes can have on the surrounding area. Today, volcanologists can locate and predict eruptions, saving lives and preventing the destruction of other cities and cultures.

Question No. 35

7047479

Question 35 belong to the following comprehension.

Comprehension:

33295

Study the following information carefully and answer the questions given below.

Eight people P, Q, R, S, T, U, V and W are sitting around a circular table facing the centre, but not necessarily in the same order. Each of them belongs to a different state, viz Delhi, Jharkhand, Punjab, MP, UP, Kerala, Bihar and TN, but not necessarily in the same order.

The one who belongs to Jharkhand is on the immediate right of T. T is third to the left of V. T is not from Delhi. Neither Q nor W is an immediate neighbour of T. U belongs to MP and is third to the right of the one who belongs to Jharkhand. The one who belongs to Bihar sits second to the left of T. The person who belongs to UP sits second to the right of the one who belongs to Punjab. R sits third to the left of U. The one who belongs to Kerala sits second to the left of the one who belongs to MP. P sits exactly between W and U and belongs to Punjab. Q sits fourth to the right of W.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

Who sits second to the right of the one who belongs to TN?

Options

- The one who belongs to Kerala
- The one who is an immediate neighbour of V and R
- The one who sits third to the left of the one who belongs to Punjab
- All of these

Question No. 33

7047479

Study the following information carefully and answer the given questions.

E, F, G, H, I, J, K and L are eight family members sitting around a circular table in a restaurant. All of them are facing the centre. Three of the family members are engineering graduates and others are arts graduates. All the eight family members are bankers. They are working in different banks Andhra Bank, Dena Bank, Syndicate Bank, Bank of India, Vijaya Bank, UCO Bank, Canara Bank and Allahabad Bank, but not necessarily in the same order. There are two married couples, three brothers, two daughters, one granddaughter and one grandson in the group. Two of the female members in the group E and L get same degree. They studied different degrees in colleges, they are B.com, BCA, M.com, BE, MBA, ME and B.sc.

K, works in Andra Bank, is the head of the family, and is immediate neighbour of L and H. The granddaughter J is sitting third to the left of K. The grandmother of J is sitting on the immediate left of her. J is arts graduate. I is sitting second to the right of his father K. He works in Vijaya Bank, and studied B.sc. Only K's daughter is sitting exactly between E and I. She studied MBA and she works in UCO Bank. L works in Syndicate Bank and F works in Bank of India. The son of L is sitting on the immediate left of his father. His father works in Dena Bank. G works in UCO Bank and J sitting on the immediate left of her mother. H, the husband of the one who works in Syndicate Bank, studied ME and his mother studied BE. The one who works in Bank of India sits second to the right of E, who is an immediate neighbour of the one who works in UCO Bank and the Canara Bank. The one who works in Canara Bank does not studied B.com and the one who works in Andra Bank does not studied M.com or BCA.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

Options

- Allahabad Bank
- Bank of India
- Syndicate Bank
- Both Allahabad Bank and Syndicate Bank

## Question No. 40

7647479  
Question 40 belong to the following comprehension.

Comprehension:

33295  
202102

Study the following information carefully and answer the questions given below;

There are eight persons D, E, G, H, R, S, T and U sitting around a circular table. Some of the persons are not facing the centre. They all like four different types of drinks, viz sprite, Slice, Limca and Pepsi, and each drink is liked by two persons. Note: Same direction means that if one person is facing the centre then the other person also faces the centre and vice versa. Opposite direction means if one person is facing the centre then the other person faces outside and vice versa. T sits on the immediate right of E, who likes Sprite. G sits third to the left of U, who likes Pepsi and both are facing the same direction. G and E are not facing the same direction but G is an immediate neighbour of R. R sits fourth to the left of T and both are facing opposite directions but like the same soft drink. The persons who like Sprite sit adjacent to each other, but face opposite directions. The persons who like Slice sit opposite each other. The immediate neighbours of R are facing the centre. The person who likes Pepsi is an immediate neighbour of the persons who like Limca. H and S are immediate neighbours of U. H is not facing the centre and likes Limca. The one who is on the immediate left of S is not facing the centre. S sits second to the right of G.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

How many persons are not facing the centre?

Options

- One
- Two
- Three
- Four

Question No: 39

7047479

Question 39 belong to the following comprehension.

Comprehension:

Study the following information carefully and answer the given questions.

There are nine people Balaji, Darshan, Kalam, Sethu, Bilal, Ramnath, Lalit, Yuvan and Nakul who sits around a circular table. Some are facing towards and some are

facing away from the centre. They like different pens among Parker, Cello, Camlin, Hero and Montex. Not more than 2 people like the same pens.

The following

information is known about them. Kalam and Lalit form the only pair that is sitting together and like the same pens. They are facing in opposite directions to each

other. The one who likes Camlin sits third to the left of Darshan but is neither Kalam nor Ramnath. Balaji sits second to the left of Ramnath, who likes Cello. The one who likes Parker is an immediate neighbour of Yuvan and Bilal but none of them sits adjacent to Kalam or Lalit. Balaji, Nakul and Yuvan face in same direction a that of Bilal. Nakul sits third to the right of Sethu, who is facing away from centre and likes Hero. Bilal sits second to the left of Kalam and likes Cello. The people who like Cello face towards the centre. Balaji neither likes Camlin or Hero.

Multiple Choice ( Select 1 out of 4 options, for the question below. )

Which of the following person likes Parker?

---

Options

- Lalit and Balaji
- Yuvan and Darshan
- Sethu and Nakul
- Balaji and Nakul

MS Word is an example of :

Options

- Application Software
- Compiler
- Operating System
- System Software

Clear Response

Question No. 37

7047479  
Question 36 to Question 38 belong to the following comprehension.

Comprehension:

33295  
Study the following information carefully and answer the given questions.

Sanjay, Vasu, Gandhi, Jairaj, Prathap, Kumar, Suresh and Ramnath are eight friends sitting around a circular table. Four of them are facing towards the centre and four of them are facing away from the centre. All of them like different currencies, viz. Dollar, Pound, Dinar, Peso, Euro, Rupee, Yen and Riyal, but not necessarily in the same order. Prathap faces towards the centre and likes Dollar. Both the immediate neighbours of Prathap face away from the centre and like Dinar or Peso. Jairaj faces away from the centre. Both the immediate neighbours of Jairaj do not face away from the centre. Prathap sits third to the right of Kumar, who likes Euro and faces away from the centre. Gandhi sits third to the left of Kumar. The one who likes Dinar sits opposite of Kumar. The one who likes Pound is not the immediate neighbour of Kumar and faces away from the centre. Sanjay sits second to the left of Gandhi and does not like Yen or Riyal. The one who likes Yen sits between Ramnath and Kumar. Vasu faces away from the centre and does not like Pound.

Multiple Choice (Select 1 out of 4 options, for the question below.)

How many persons sit between Jairaj and Prathap, count from the right of Jairaj?

Options

- Five
- Four
- Three
- Two
